CoreWeave, an AI cloud provider backed by [Nvidia](#), filed paperwork for an initial public offering on Monday—kicking off what investors hope will be a long-awaited wave of tech IPOs.

But the New Jersey company's S-1 filing revealed some significant flags in the business even as red-hot demand for AI has sent its top line soaring by more than 700% in its most recent year. Just two customers accounted for 77% of that revenue, while losses have ballooned, CoreWeave stated in its prospectus, which also warned of “material weaknesses” in the company's capacity to manage its internal financial reporting and IT systems.

How the market responds to the offering—[CoreWeave](#) said it will list shares on the Nasdaq under the CRWV ticker, but did not specify how much cash it plans to raise—will be a test of investors’ appetite for AI amid a yearslong drought in IPOs. [Reuters reported](#) that CoreWeave was seeking to list shares at a valuation of \$35 billion, citing anonymous sources.

“We are the AI Hyperscaler driving the AI revolution,” the company said in [its S-1 filing](#), likening AI to a “new industrial revolution,” and boasting about its arsenal of 250,000 GPUs (the specialized and difficult-to-obtain chips used to train and run AI services) distributed across its 32 data centers.

Nvidia, the \$3 trillion chipmaker that is the leading provider of GPUs, owns a 1.21% stake in CoreWeave according to the filing. The company’s three cofounders—Michael Intrator, Brannin McBee, and Brian Venturo—own a combined 83% of the company’s voting power thanks to a special class of stock. A [report in The Information](#) on Monday noted that the trio of former commodity traders have each sold at least \$150 million of their shares ahead of the offering.

This is the first tech IPO of 2025, and the first of Trump’s second term. Tech has been in a [persistent IPO drought](#) since the high-highs of 2021. Though there have been a few venture-backed winners who’ve

braved the public markets—like Rubrik, Reddit, and ServiceTitan—the dearth of major exits has facilitated issues for venture capital firms, who have often turned to secondaries in hopes of seeing liquidity. Under Chair Lina Khan, the FTC was famously tough on possible M&A for Big Tech. But there’s hope that under the Trump administration, deals will rip and the IPO market will soar, though that has yet to be seen.

The IPO drought has also coincided with the AI boom that was kicked off in November 2022, when
